

Doruk Sasmaz

Game Programmer

📍 Stockholm

I'm a game programmer with a strong interest in multiplayer games. I have experience working in Unity and Unreal, and I enjoy creating systems that support smooth gameplay and player interaction.

🎓 Education

2024 - 2026 | Game Programming

Futuregames, Stockholm, Sweden

2020 - 2024 | Digital Game Design

Bahcesehir University, Istanbul, Turkey

📅 Experience

2025.02 -
PRESENT

Game Programmer

TENSTACK, Game Development

- Worked on the company's two latest titles, Pullback Racers and Gamble With Your Friends, both multiplayer projects built in Unity using Mirror Networking.
- Developed core networked systems, gameplay features, UI, and internal tools as one of two programmers on the team.
- Acted as a bridge between design, art, and code on Gamble With Your Friends, helping integrate content and gameplay logic.
- Part of bringing Gamble With Your Friends close to release, reaching 130,000 Steam wishlists.

2022.11 -
2025.02

Co-Founder

Diabolical Studios, Game Development

- Co-founded a student-run indie studio and worked as a generalist across programming, art, and game design.
- Created multiple game jam projects and contributed to Forgekeepers, a game currently in development and available on Steam.
- Worked mainly on singleplayer projects, with some local multiplayer titles developed during jams.

2023.07 -
2023.08

UI Design Intern

Jotform, SaaS Web Commerce

- Designed and helped implement a calendar system for enterprise users, enabling recurring task scheduling.
- Created UI designs in Figma and collaborated closely with other interns during implementation.
- Gained experience working on real production features in a large web platform.

2022.01 -
2022.06

UX Design Intern

Koctas, Web Commerce

- Worked on the main website, creating and integrating sales banners and campaign pages for influencer marketing.
- Built web pages using HTML, CSS, and JavaScript, forming a foundation still used in personal and professional projects.

★ Projects

2026

Gamble With Your Friends [↗](#)

Online Co-Op Casino Simulator, TENSTACK

- Built lobby and session systems using Steamworks for online co-op play.
- Developed core networking, UI, and internal tools in Unity.
- Created analytics tools for balancing and gameplay data collection.

2025

2025 | Pullback Racers [↗](#)

Online Co-Op Racing Game, TENSTACK

- Worked as a generalist on the team's first multiplayer project.
- Implemented gameplay and networking systems using Unity and Mirror.
- Contributed across gameplay, UI, and technical problem-solving.

2025

2025 | Forgekeepers [↗](#)

Roguelite Bullet Hell Survivor, Diabolical Studios

- Solo-developed most core systems in Unity.
- Designed and implemented gameplay mechanics and progression systems.

2025

2025 | Thornbound [↗](#)

Singleplayer Horror Adventure, Futuregames GP3

- Developed weapon and combat systems in Unreal Engine.
- Focused on responsive combat mechanics in a singleplayer horror setting.
- Won an award for best Art at the Futuregames Awards.
